

Aman Agrahari

aman8cse@gmail.com | 7234909407 | [PORTFOLIO](#) | [GITHUB](#) | [LINKEDIN](#)

Full-stack engineer focused on backend architecture, real-time systems, and scalable web applications. Experienced in designing event-driven services, distributed state management, and production systems serving 4,000+ users.

SKILLS

Frontend Development : ReactJS, Redux, CSS3, Tailwind CSS, GSAP, Lenis

Backend Development : Node.js, Express.js, MongoDB, Redis, BullMQ, Socket.IO

Languages: Java (Solved 250+ Leetcode Problems), JavaScript, C, Python

Tools : GitHub, AWS, Docker, Cursor, Claude, Codex, Vercel, Render, Figma, Canva

PRODUCTS & PROJECTS

Watchroom - Real-Time Watch Party Platform

React.js, Node.js, Express.js, Socket.IO, MongoDB, JWT, REST APIs

- Engineered a real-time watch party platform enabling synchronized YouTube playback, live chat, reactions.
- Built room ownership, moderator controls, participant permissions, and session lifecycle management.
- Implemented Socket.IO and Redis Pub/Sub for fault-tolerant room orchestration and near real-time synchronization.

Impact - Solved distributed state synchronization challenges using Redis Pub/Sub and WebSockets, ensuring consistent playback state across all connected users with minimal latency.

LIC Calc - Insurance Analytics & Advisory Engine

React.js, Node.js, Express.js, MongoDB, JWT, Gemini Flash-1.5, REST APIs

- A platform for LIC agents to manage the client data online and export customized PDF reports for insurance plans
- Uses **Gemini** to filter chatbot based input of data fields and **built-in engine for policy calculation**.

Impact - PDF customized plans increased client **approval rates by 50%**

My Attendance - Live QR-Based Smart Attendance Platform

React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Developed a **dynamic QR based system** to manage attendance 100% online and remotely.
- Provides statistical analysis with Admin & User dashboards **increasing transparency** for both parties.
- Offers **proxy-less attendance** without any expensive hardware.

Impact - Reduced attendance time by 8 minutes and manual **errors to 0%**, resolved proxy attendance due to QR + Geotag.

Crew Or Crook - Real-Time Multiplayer Gaming Platform (AmongUs Inspired)

Node.js, Express.js, Socket.IO, MongoDB, Redis, JWT

- Designed a **real-time multiplayer game** backend supporting 2000+ users built on NodeJS.
- Built WebSocket-based live synchronization engine for player states and game-room logic.
- Uses Redis for blazing-fast data exchanges and optimizes database query times.
- Engineered dynamic room management and session handling for concurrent gameplay using MongoDB.

EXPERIENCE

Google Developers Group JSS

April 2025 - Present

Web Developer

- Collaborated using Git workflows, pull requests, and code reviews.
- Worked for 4 months on a recent project and gained experience with real world git - github usage in teams
- Deployed backend systems on AWS, Render, Vercel and similar platforms

April 2026 - May 2026

Web3Task

Full Stack Developer Internship

- Contributed to a production application with 1M+ downloads.
- Fixed bugs and implemented feature enhancements in a large-scale codebase, Redesigned and developed frontend pages to improve usability and user experience.
- Assisted in deployment and CI/CD processes for production releases.

EDUCATION

JSS Noida

Sept 2024 - Aug 2028

B.Tech - CSE (DATA SCIENCE)

CGPA: 8.05
