

Aman Agrahari

aman8cse@gmail.com | 7234909407 | [PORTFOLIO](#) | [GITHUB](#) | [LINKEDIN](#)

Full-stack developer experienced in building modular, scalable web apps. Developed and deployed production systems serving 4,000+ users, with strong focus on backend architecture, performance optimization, and clean system design.

SKILLS

Frontend Development : ReactJS, Redux, CSS3, Tailwind CSS, GSAP, Lenis

Backend Development : NodeJS, Express, MongoDB, Redis

Languages: Java (Solved 200+ Leetcode Problems), JavaScript, C, Python

Tools : GitHub, AWS, Vercel, Render, Figma, Canva

PRODUCTS & PROJECTS

My Attendance - Live QR-Based Smart Attendance Platform

MERN | QR JS

- Developed a **dynamic QR based system** to manage attendance 100% online and remotely.
- Provides statistical analysis with Admin & User dashboards **increasing transparency** for both parties.
- Offers **proxy-less attendance** without any expensive hardware.

Impact - Reduced attendance time by 8 minutes and manual **errors to 0%**, resolved proxy attendance due to QR + Geotag.

LIC Calc - Insurance Analytics & Advisory Engine

MERN | PDF JS | Tailwind CSS | Gemini 1.5 Flash

- A platform for LIC agents to manage the client data online and export customized PDF reports for insurance plans
- Uses **Gemini** to filter chatbot based input of data fields and **built-in engine for policy calculation**.

Impact - PDF customized plans increased client **approval rates by 50%**

Renaissance'26 - Production-Grade E-Summit Management Platform

MERN | Razorpay

- Architected and deployed a full-stack event management system to **serve 2,500+ registered users**.
- Secure role based admin, volunteer and user control panel for managing events & registrations.
- Gamified participation using coins and payment gateway

Impact - Due to online platform we reduced **manual admin jobs by 80%** and increased **participation in events by 40%**

Crew Or Crook - Real-Time Multiplayer Gaming Platform (AmongUs Inspired)

NODE | Express JS | Redis

- Designed a **real-time multiplayer game** backend supporting 2000+ users built on NodeJS.
- Built WebSocket-based live synchronization engine for player states and game-room logic.
- Uses Redis for blazing-fast data exchanges and optimizes database query times.
- Engineered dynamic room management and session handling for concurrent gameplay using MongoDB.

EXPERIENCE

Google Developers Group JSS

April 2025 - Present

Web Developer

- Learned to work in a professional environment following code writing and reviewing guidelines
- Worked for 4 months on a recent project and gained experience with real world git - github usage in teams
- Deployed backend systems on AWS, Render, Vercel and similar platforms

Sept 2025 - Nov 2025

Smart India Hackathon

Team Leader

- Ranked 1 out of 130 teams in SIH internal round
- Lead a team of 6 members, worked of 2 different projects, developed MVP using MERN and blockchain.
- Contributed in App development and team leadership

EDUCATION

JSS Noida

B.Tech - CSE (DATA SCIENCE)

Sept 2024 - Aug 2028

CGPA: 8.05
